

KUBO goes on a Road Trip

(PRIMARY FOCUS: SOCIAL STUDIES)

For students from approximately 7 to 10 years old.

SUMMARY

Using a list of national parks and monuments, students can mark, draw and design their selected country.

BEFOREHAND

Students should understand how to use KUBO Coding and Coding+ TagTiles®.

RESOURCES

- 1 KUBO robot per pair, fully charged
- 1 set of KUBO Coding TagTiles
- 1 set of KUBO Coding+ TagTiles
- 1 blank map

CROSS-CURRICULAR LINKS

- Math: Students calculate how far KUBO traveled on the map in actual distance in order to see all the sites and then determine how long the trip is in the real world. They use these two distances to calculate a scale for the map.
- ELA: Students research facts about each site and interview people who have visited those sites.
